More than a membrane

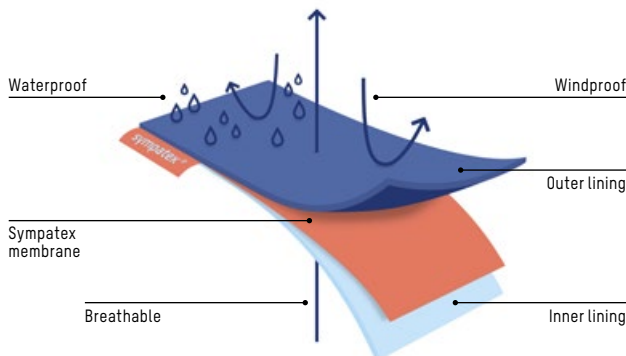

// 3 LAYERS

Full mobility and freedom of movement are a given with our Sympatex membrane. With a 3D optimized fit and coupled with our 3-layer lightweight stretch, it delivers comfort at every turn.

// TECHNOLOGY WITH AN EDGE

DYNAMIC BREATHABILITY WITH SYMPATEX®

In contrast to other membrane technologies, the poreless compact Sympatex membrane is based on a physical and chemical principle. The water-attracting (hydrophilic) part of the membrane absorbs the moisture from the body and emits it to the outside by evaporation. The water vapor molecules are transported outwards along the hydrophilic molecular chains. The molecular structure (hydrophilic components) of the Sympatex membrane swells with moisture and therefore provides space for water transport and fast evaporation.
